

Trauma Strap

Part #: 10733

Custom configurations not available.
Not repairable. Contact customer
service for details.

The Trauma Strap is designed to prevent orthostatic intolerance, otherwise known as suspension trauma, by allowing a worker to achieve a standing position while waiting to be rescued. This functions to relieve pressure from the legs and allow blood to flow more regularly.

The Trauma Strap is not intended to replace a rescue plan. The employer must always have a jobsite-specific rescue plan in place, and the means to implement that plan.

Seek medical attention immediately if exposed to a fall/suspension.

The Trauma Strap is not to be used as an anchor, lanyard, or any other form of fall protection, except in the manner detailed by these instructions.

Maximum worker capacity (including all clothing, tools, and equipment) is 420 lbs.

WARNING

Use of equipment in unintended applications may result in serious injury or death.

Materials: nylon, polyester, and steel.

UPC-A Code: 672421107332
