Never again buy too little or too much project material

Works in Feet, Inches, Yards, Fractions and meters – including square and cubic. Converts between all standard dimensional formats.

Find the number of tiles for an area. 11 different tile sizes built in.

Find the quantity of paint needed to paint an area – pints, quarts or gallons.

The Home ProjectCalc helps you quickly estimate material quantities and costs for your projects. It will simplify your home improvement and decorating projects.

Reduce calculation errors and get exactly what you need for your projects – including Paint, Wallpaper, Tile, Carpet and Concrete. Save time and money on material requirements.

Paint —

Calculate number of pints, quarts or gallons needed (default coverage is 350 sq ft per gallon).

Wall Paper —

Calculate number of 56 sq ft rolls needed.

Tile —

11 built-in tile sizes – 24", 18", 16", 13", 12", 10", 8", 6", 4", 2", 1".

Carpet —

3 built-in carpet lengths – 12', 13', 15'.

Concrete —

Calculate number of 80# (0.67 cu ft) bags needed.
