

CST-berger SAL 'N' Series Automatic Level Kit - Save time & money on every job!

Precision

- ♦ Magnetically dampened, wire-hung compensator for optimum range & accuracy
- ♦ Large & effective aperture with minimum focus of 1'
- ♦ Fine motion knobs on both sides with friction-braked rotation and endless horizontal drive

Easy to use

- ♦ Top-mounted optical peep-sight for quick reference
- ♦ Easy-to-read horizontal circle
- ♦ Right angle prism for easy bubble viewing
- ♦ 1:1000 stadia for distance estimation

Value-packed

- ♦ Water-resistant, sealed construction with sunshade for use in various weather conditions
- ♦ Compensator lock protects laser during transport or storage as well as acting as a handy compensator checking tool
- ♦ Includes hard shell carrying case with dual latches, lens cover, plumb bob, Allen wrench, adjusting pin, aluminium tripod & levelling rod for instant operation

Model	BR55-SLVP24ND
Description	CST-Berger SAL"N" Automatic Level Kit
Magnification	24x
Horizontal Angle	1°
Vertical Angle	N/A
Levelling Accuracy	+/- 1/16" @ 150'
Working Range	up to 300' diameter
Clear Objective Aperture	36 mm
Compensator Setting Accuracy	+/-0.8°C
Standard Deviation (for 1 km Double-run Levelling)	2.0 mm
Weight	60 lbs

BR55-SLVP24ND

CST-berger Magnetic Locator - Get to know your terrain

Control

- ♦ Detect metal blockages or locate structures quickly & effectively
- ♦ Manual controls allow user to 'erase' magnetic disturbances such as fences & set sensitivity levels for precise readings
