

# The Rack

## Part #: 15169

The Rack, when used in combination with a compatible system, as specified by user instruction manual, is compliant with all applicable ANSI IWCA I-14.1-2001 regulations.

Custom configurations not available. Not repairable.  
Contact customer service for details.

The Rack is a welded steel frame for placement on a building's parapet, and functions to assist in window washing applications. Parapet must withstand loads of at least 5,000 lbs., as determined by a Qualified Person.

All PFAS equipment must be deemed compatible by a Competent Person. Always read and understand all PFAS equipment instructions.

Compatible with parapets between 10" - 24" wide. Parapet must be at least 10" in height. After installation, The Rack must be fully flush and fully set on parapet.

Window washing ropes must not be used longer than 2 years from Date of First Use, or 3 years from Date of Manufacture. On descents exceeding 130', provisions must be made for continuous suspension, intermittent suspension, or for a work station. Descents must never exceed 300'.

The Rack must be tied off with a safety line to a certified anchor point, and the user must be tied off with a tie-back rope to a SEPARATE certified anchor point. Anchor points must be directly in line with The Rack.

Materials: galvanized steel.

MAXIMUM 1 user per unit.

UPC-A Code(s): 672421151694
