Gotcha CRD Rescue Kit

Gotcha CRD Rescue Kit:

The CRD Constant Rate Descent is device suitable for rescue and evacuation. It is suitable for rescue from vertical situations where you can access the fallen worker.

- Suitable for evacuation from high structures where constant rate lowering & minimal user input are required.
- The victim can be lowered to safety or raised for limited distances.
- The user can descend to safety at a constant rate controlled by the device.
- No assembly required by the user.
- Multiple evacuation - once the first user has safely descended, the system can be used by additional users in quick succession.
- Two person use - the Gotcha CRD is rated for loads up to 495 lbs.
- Available in lengths of up to 1,310' for loads up to 330 lbs.

Gotcha Fire & Rescue Kit:

This is a rescue kit for the pro, and is ideally suited for fire and rescue services. The Fire & Rescue Kit provides a flexible solution to rescues involving vertical, horizontal, and tensioned lines.

- Suitable for rescue from vertical and horizontal situations where a flexible line system is required that can be tensioned or released in a controlled manner. This will allow raising, lowering, and tensioning operations.
- Victims can be recovered without the need to cut them free.
- The Gotcha Fire & Rescue Kit is capable of rescuing vertically up and down as well as horizontally by tensioning.
- No assembly required, but the kit can be changed from lowering mode to raising mode by altering its configuration.
- Assisted rescue - can be used in many ways, as well as in conjunction with a second kit to provide additional security where required.
- A single kit is capable of lowering or raising a single casualty.
- Two person use - two kits used together will provide a secondary system suitable for lowering a rescuer to the victim and then raising or lowering both the rescuer and the victim to a point of safety.
- Capable of being used for lowering operations up to maximum length.
