

Haglöf Sweden - precision and efficiency in forest & field measurement work since 1943.

G round Truth Measurements

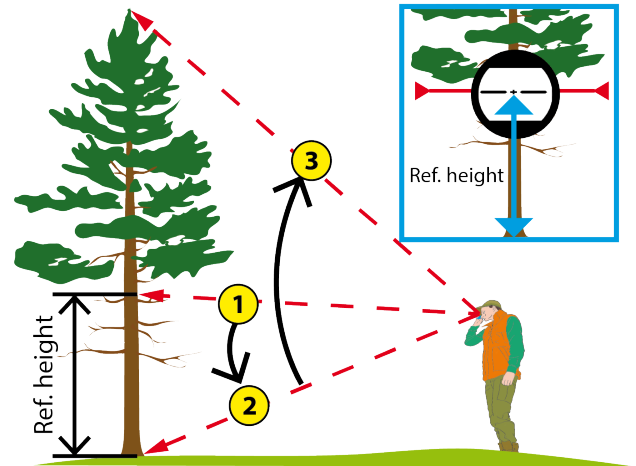

- Or as we would say: the foundation to really get to know the forest.

The digital MD II Bluetooth Caliper with icon-based menu system is now delivered together with the MD II Com PC communication program. Name up to 100 different tree species, store data internally or transfer online to tablet or mobile phone. A great product with even greater user area!

We are presenting a number of exciting new products this season - keep your eyes open for more news from us!

February -17 New Product Feature: EC II D

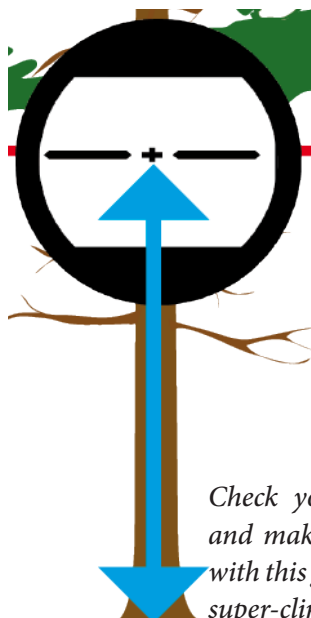

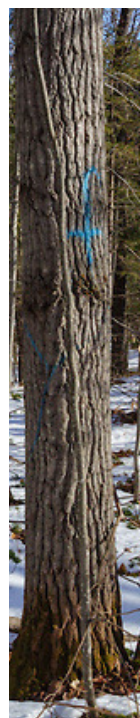

Great News All Foresters!

We had planned to release this great product news at Elmia Wood in June - but we just can't keep it a secret any longer! One of the most asked for features has been incorporated into one of our most popular instruments:

Distance calculation in the EC II!

The new model **EC II D** uses basic trigonometry to calculate the distance between you (the user) and the object to measure. Set a reference height mark on the object at 2 meters/6 feet. Step back for good vision of the mark and the object. Measure the angle to the reference mark, followed by the usual base angle and top angle. The total height is presented to you!

Instrument Name:
EC II D

Article number:
15-102-1019

Price? **The same** as previous model!

When? This new EC II model is available to order now - deliveries start on March 1, 2017.

Check your 2017 year pricelist and make sure to fill your stock with this ground-breaking, digital super-clinometer!
