

24" Eco-Tech Bamboo Level

Model #: 1610-2400
UPC: 049448161027
MSRP:

Aluminum gauging edges assure durability. EZ™ clean coating resists mortar adhesion. Curved vials for smooth bubble travel. Unbreakable polycarbonate vial windows. Ideal for masonry work.

PRODUCT DETAILS

Bamboo is the fastest growing plant on Earth. Despite being classified as a "Wood Level", bamboo is actually a grass, and is an environmentally friendly, renewable resource. Bamboo is excellent material for levels, especially for masonry work. Concrete will not adhere well to the surface. Bamboo is more abrasion resistant than a painted metal level. Bamboo is more moisture resistant than traditional wood levels.

- Aluminum gauging edges assure durability
- EZ™ clean coating resists mortar adhesion
- Curved vials for smooth bubble travel
- Unbreakable polycarbonate vial windows
- Ideal for masonry work
