

Product Data Sheet

PORTABLE SPEED BUMP

No. 41170 - 12/13

PRODUCT NUMBER:

1170 - PORTABLE SPEED BUMP

I. GENERAL DESCRIPTION

Features: The Aervoe Portable Speed Bump is designed for temporary placement on roads, parking lots, warehouse floors, etc., to slow vehicle speed. It is made of durable, impact and UV resistant polypropylene and will not fade or crack. It can withstand 20,000 pounds and has black rubber pads on the bottom to prevent sliding when being run over.

Each of the 26 yellow plastic body pieces has 2 high-intensity reflective strips for greater visibility. One end of the Speed Bump has a heavy-duty handle to use to unroll and maneuver it into position.

The Speed Bump extends to almost 10 feet and will roll up into a 20" diameter for storage. Includes a heavy-duty nylon storage bag with strap handles. It also comes with an extra plastic hinge rod to link two Speed Bumps together to span 20 feet.

Benefits: A portable speed bump allows you to temporarily reduce vehicle speed and relocate it to different locations based on need.

Uses: Use in school zones, constructions sites, events, warehouse floors, or anywhere a portable, temporary speed bump is required to reduce speed.

Directions: Remove from the nylon bag and use the handle to unroll. Flip it over so the rubber feet are on the bottom. Using the handle, pull it into the desired location.

Warnings: Read operating instructions thoroughly prior to use. Use caution when lifting.

Packaging:

Case: (1/case)

48 lbs. (21.8kg)

2.3 CF (0.07 CM)

20.5" L x 9.45" W x 20.5" H
