

SUPERCRAFT mallets with break-proof steel tube handle and ergonomic, anti-slip grip

3377.070

Product Description

The head of the SUPERCRAFT mallet is filled with steel shot. This means that when the workpiece is impacted, the energy of the shot is transferred with a slight delay. The reduced rebound allows the impact energy to be absorbed, resulting in extremely powerful impact without vibration which is much easier on your joints. Additionally, an advantage over steel mallets is the reduced noise level.

Application Areas

Positioning and joining of workpieces, assembly of sharp-edged workpieces, straightening work, housing assembly, plant construction, maintenance, repair and overhaul work, assembly and repair work in the automotive and truck sector, sheet-metal working

Completely robot-welded, robust powder coating, maximum solidity of the inserts made from special nylon with excellent impact quality and very high durability, inserts replaceable

Material

Inserts

- Nylon, white
- hard
- very wear-resistant
- no chipping
- noise-dampening
- Very high impact

Handle

- Steel tube and ergonomic rubber grip
