**Top
View**

DIRECTIONS:

Position the metal bracket of the Stake Chaser® onto the tool's spring-pin so that the Stake Chaser's strands are adjacent to the beveled side of the tool.

Position the tool and attached Stake Chaser on the center top edge of the stake with the loop of the Stake Chaser bracket overlapping the stake.

Strike the top of the tool with a hammer to drive the Stake Chaser bracket into the top of the wood stake.
